

EOAssistant

Inherits from: com.webobjects.eoapplication.EOComponentController
Implements: com.webobjects.eoapplication.EOApplication._QuitHandler
Package: com.webobjects.eogeneration

Class Description

Documentation for this class is forthcoming.

Constants

EOAssistant defines the following constants:

Constant	Description
ControllerTypeKey	
EnumerationEntityNamesKey	
KeysKey	

CLASS EOAssistant

Constant	Description
MainEntityNamesKey	
PropertyKeyKey	
WidgetControllerKey	

Method Types

All methods

sharedAssistant
startAssistant
activeWindowDidChange
addEditor
addRule
allEntityNames
allPrimitivePropertyKeyTaskNames
allPropertyKeyTaskNames
allQuestionNames
allValuesForKey
allValuesForValueKey
apply
canPerformActionNamed
defaultActions
defaultValue
dispose
editorSpecificationValueForKey

CLASS EOAssistant

editors
hasRuleValueOtherThanDefault
removeRule
resetRuleValueToDefault
restart
revert
ruleValue
ruleValue
rules
save
setEditorSpecificationValueForKey
setRuleValue
toString

Static Methods

sharedAssistant

```
public static EOAssistant sharedAssistant()
```

startAssistant

```
public static void startAssistant(NSArray NSArray)
```

Instance Methods

activeWindowDidChange

```
public void activeWindowDidChange(NSNotification aNSNotification)
```

addEditor

```
public void addEditor(EOAssistant.Editor anEditor)
```

addRule

```
protected void addRule(EOAssistantRule anEOAssistantRule)
```

allEntityNames

```
public NSArray allEntityNames()
```

allPrimitivePropertyKeyTaskNames

```
public NSArray allPrimitivePropertyKeyTaskNames()
```

CLASS EOAssistant

allPropertyKeyTaskNames

```
public NSArray allPropertyKeyTaskNames()
```

allQuestionNames

```
public NSArray allQuestionNames()
```

allValuesForKey

```
public NSArray allValuesForKey(String aString)
```

allValuesForValueKey

```
public NSArray allValuesForValueKey(String aString)
```

apply

```
public boolean apply()
```

canPerformActionNamed

```
public boolean canPerformActionNamed(String aString)
```

CLASS EOAssistant

defaultActions

```
protected NSArray defaultActions()
```

defaultValue

```
public Object defaultValue(  
    String aString,  
    NSDictionary aNSDictionary)
```

dispose

```
public void dispose()
```

editorSpecificationValueForKey

```
public String editorSpecificationValueForKey(String aString)
```

editors

```
public NSArray editors()
```

hasRuleValueOtherThanDefault

```
public boolean hasRuleValueOtherThanDefault(  
    String aString,  
    NSDictionary aNSDictionary)
```

CLASS EOAssistant

removeRule

```
protected void removeRule(EOAssistantRule anEOAssistantRule)
```

resetRuleValueToDefault

```
public void resetRuleValueToDefault(  
    String aString,  
    NSDictionary aNSDictionary)
```

restart

```
public void restart()
```

revert

```
public void revert()
```

ruleValue

```
public Object ruleValue(  
    String aString,  
    NSDictionary aNSDictionary)
```

CLASS EOAssistant

ruleValue

```
public Object ruleValue(  
    String aString,  
    NSDictionary aNSDictionary,  
    NSDictionary aNSDictionary)
```

rules

```
public NSArray rules()
```

save

```
public boolean save()
```

setEditorSpecificationValueForKey

```
public void setEditorSpecificationValueForKey(  
    String aString,  
    String aString)
```

setRuleValue

```
public void setRuleValue(  
    String aString,  
    NSDictionary aNSDictionary,  
    Object anObject)
```

CLASS EOAssistant

toString

```
public String toString()
```

EOAssistantAction

Inherits from: com.webobjects.eoapplication.EOAction

Package: com.webobjects.eogeneration

Class Description

Documentation for this class is forthcoming.

Method Types

All methods

EOAssistantAction

actionPerformed

Constructors

EOAssistantAction

```
public EOAssistantAction(com.webobjects.eoapplication.EOXMLUnarchiver anUnarchiver)
```

Description forthcoming.

Instance Methods

EOAssistantAction

```
public EOAssistantAction(com.webobjects.eoapplication.EOXMLUnarchiver anEOXMLUnarchiver)
```

Description forthcoming.

actionPerformed

```
public void actionPerformed(java.awt.event.ActionEvent anActionEvent)
```

Description forthcoming.

EOAssistantRule

Inherits from: Object

Package: com.webobjects.eogeneration

Class Description

Documentation for this class is forthcoming.

Method Types

All methods

EOAssistantRule

EOAssistantRule

key

setKey

setSpecification

setValue

specification

CLASS EOAssistantRule

toString

value

Constructors

EOAssistantRule

```
public EOAssistantRule(  
    String aString,  
    NSDictionary aNSDictionary,  
    Object anObject)
```

EOAssistantRule

```
public EOAssistantRule()
```

Instance Methods

key

```
public String key()
```

setKey

```
public void setKey(String aString)
```

CLASS EOAssistantRule

setSpecification

```
public void setSpecification(NSDictionary aNSDictionary)
```

setValue

```
public void setValue(Object anObject)
```

specification

```
public NSDictionary specification()
```

toString

```
public String toString()
```

value

```
public Object value()
```

CLASS EOAssistantRule

EOEntitiesEditor

Inherits from:	com.webobjects.eoapplication.EOComponentController
Implements:	client.assistant.EOAssistant.Editorclient.assistant._EOEditorString List.ChangeListener
Package:	com.webobjects.eogeneration

Class Description

Documentation for this class is forthcoming.

Method Types

All methods

- EOEntitiesEditor
- connectionWasEstablished
- prepareComponent
- priority
- refresh

CLASS EOEntitiesEditor

stringListChanged

stringListResetToDefaultRequest

Constructors

EOEntitiesEditor

public EOEntitiesEditor()

Instance Methods

connectionWasEstablished

protected void connectionWasEstablished()

prepareComponent

protected void prepareComponent()

priority

public int priority()

CLASS EOEntitiesEditor

refresh

```
public void refresh()
```

stringListChanged

```
public void stringListChanged(  
    _EOEditorStringList a_EOEditorStringList,  
    NSArray aNSArray)
```

stringListResetToDefaultRequest

```
public void stringListResetToDefaultRequest(_EOEditorStringList a_EOEditorStringList)
```

CLASS EOEntitiesEditor

EOMiscellaneousEditor

Inherits from: com.webobjects.eoapplication.EODocumentController
Implements: client.assistant.EOAssistant.Editor
Package: com.webobjects.eogeneration

Class Description

Documentation for this class is forthcoming.

Method Types

All methods

EOMiscellaneousEditor
connectionWasEstablished
priority
refresh

Constructors

EOMiscellaneousEditor

```
public EOMiscellaneousEditor()
```

Instance Methods

connectionWasEstablished

```
protected void connectionWasEstablished()
```

priority

```
public int priority()
```

refresh

```
public void refresh()
```

EOPropertiesEditor

Inherits from: com.webobjects.eoapplication.EOComponentController

Implements: client.assistant.EOAssistant.Editorclient.assistant._EOEditorStringSelector.ChangeListenerclient.assistant._EOEditorStringList.ChangeListenerclient.assistant._EOEditorStringAddition.AdditionListener

Package: com.webobjects.eogeneration

Class Description

Documentation for this class is forthcoming.

Method Types

All methods

EOPropertiesEditor

connectionWasEstablished

prepareComponent

CLASS EOPropertiesEditor

priority
refresh
stringAdded
stringListChanged
stringListResetToDefaultRequest
stringSelectionChanged

Constructors

EOPropertiesEditor

public EOPropertiesEditor()

Instance Methods

connectionWasEstablished

protected void connectionWasEstablished()

prepareComponent

protected void prepareComponent()

CLASS EOPropertiesEditor

priority

```
public int priority()
```

refresh

```
public void refresh()
```

stringAdded

```
public void stringAdded(  
    _EOEditorStringAddition a_EOEditorStringAddition,  
    String aString)
```

stringListChanged

```
public void stringListChanged(  
    _EOEditorStringList a_EOEditorStringList,  
    NSArray aNSArray)
```

stringListResetToDefaultRequest

```
public void stringListResetToDefaultRequest(_EOEditorStringList a_EOEditorStringList)
```

CLASS EOPropertiesEditor

stringSelectionChanged

```
public void stringSelectionChanged(  
    _EOEditorStringSelector a_EOEditorStringSelector,  
    String aString)
```

client.assistant.EOWidgetParametersEditor

Inherits from:	com.webobjects.eoapplication.EODocumentController
Implements:	client.assistant.EOAssistant.Editorclient.assistant._EOEditorStringSelector.ChangeListener
Package:	com.webobjects.eogeneration

Class Description

Documentation for this class is forthcoming.

Method Types

All methods

- EOWidgetParametersEditor
- connectionWasEstablished
- priority
- refresh
- stringSelectionChanged

Instance Methods

EOWidgetParametersEditor

```
public EOWidgetParametersEditor()
```

connectionWasEstablished

```
protected void connectionWasEstablished()
```

priority

```
public int priority()
```

refresh

```
public void refresh()
```

stringSelectionChanged

```
public void stringSelectionChanged(  
    _EOEditorStringSelector a_EOEditorStringSelector,  
    String aString)
```

client.assistant.EOWindowParametersEditor

Inherits from:	com.webobjects.eoapplication.EODocumentController
Implements:	client.assistant.EOAssistant.Editorclient.assistant._EOEditorStringSelector.ChangeListener
Package:	com.webobjects.eogeneration

Class Description

Documentation for this class is forthcoming.

Method Types

All methods

- EOWindowParametersEditor
- connectionWasEstablished
- priority
- refresh
- stringSelectionChanged

Instance Methods

EOWindowParametersEditor

```
public EOWindowParametersEditor()
```

connectionWasEstablished

```
protected void connectionWasEstablished()
```

priority

```
public int priority()
```

refresh

```
public void refresh()
```

stringSelectionChanged

```
public void stringSelectionChanged(  
    _EOEditorStringSelector a_EOEditorStringSelector,  
    String aString)
```

EOXMLEditor

Inherits from: com.webobjects.eoapplication.EODocumentController
Implements: client.assistant.EOAssistant.Editor
Package: com.webobjects.eogeneration

Class Description

Documentation for this class is forthcoming.

Method Types

All methods

- EOXMLEditor
- connectionWasEstablished
- fetchesOnConnect
- priority
- refresh
- saveXMLToFile

Constructors

EOXMLEditor

```
public EOXMLEditor()
```

Instance Methods

connectionWasEstablished

```
protected void connectionWasEstablished()
```

fetchesOnConnect

```
public boolean fetchesOnConnect()
```

priority

```
public int priority()
```

CLASS EOXMLEditor

refresh

```
public void refresh()
```

saveXMLToFile

```
public void saveXMLToFile(String aString)
```

CLASS EOXMLEditor

client.assistant.EOAssistant.Editor

Package: com.webobjects.eogeneration

Interface Description

Documentation for this interface is forthcoming.

Method Types

All methods

priority

refresh

Instance Methods

priority

`public abstract int priority()`

Description forthcoming.

refresh

`public abstract void refresh()`

Description forthcoming.

client.assistant.EOWidgetParametersEditor.ValueCustomizer

Package: com.webobjects.eogeneration

Interface Description

Documentation for this interface is forthcoming.

Method Types

All methods

refreshWithTaskEntityPropertyKeyParameters

INTERFACE
client.assistant.EOWidgetParametersEditor.ValueCustomizer

Instance Methods

refreshWithTaskEntityPropertyKeyParameters

```
public abstract void  
    refreshWithTaskEntityPropertyKeyParameters(String aString, String aString, String aString, boolean aBoolean)
```

Description forthcoming.

client.assistant.EOWindowParameters Editor.ValueCustomizer

Package: com.webobjects.eogeneration

Interface Description

Documentation for this interface is forthcoming.

Method Types

All methods

refreshWithEntityTaskQuestionParameters

INTERFACE
client.assistant.EOWindowParametersEditor.ValueCustomizer

Instance Methods

refreshWithEntityTaskQuestionParameters

```
public abstract void  
    refreshWithEntityTaskQuestionParameters(String aString, String aString, String aString, boolean aBoolean)
```

Description forthcoming.
